ARTICLES OF ASSOCIATION (AD)

Bismillaahir rahmaanir rahiim

MUKADDIMAH

The truth is that knowledge and wisdom come from Allah SWT as the main gift given by Allah to the chosen human race. Therefore, humans must be grateful by using and utilizing it in accordance with His will. By being grateful, Allah will increase His grace and bounty; and by denying, Allah will send disaster.

Aware of the mandate given by Allah as caliph on earth. Aware of the mission of the human caliphate to build earth civilization for the prosperity and welfare of humans (ista'marokum fiha). Therefore, building prosperity (muslihun) and preserving the earth is a mission that must be in accordance with the will of Allah, and carrying it out is an integral part of worshipping Him. Therefore, we as scholars, academics, observers and economic actors, express our determination and unite our steps to develop the Islamic economy, which is an economy based on faith, ethical values and Islamic morality (akhlaqul-karimah) and normative sharia arrangements.

As a form of our responsibility as human beings and as citizens of the Unitary State of the Republic of Indonesia based on Pancasila and the 1945 Constitution, we are determined and united to participate in promoting the general welfare, educating the nation's life and finding solutions and problem solving to various issues of economic justice, poverty reduction, distribution inequality, finance and monetary and various other economic issues.

Thanks to the grace of Allah SWT and driven by a noble desire to develop and advance the economy of the people and the nation, then with the National Convention of Islamic Economists held at the Palace of the Vice President of the Republic of Indonesia on March 3-4, 2004, we declared the establishment of the organization of the Indonesian Islamic Economists Association (IAEI).
